Completion Tools

Evolution Oil Tools has a complete selection of **Packers and Completion** Equipment and accessories.

Bridge Plugs / Cement Retainers

We offer versions of Bridge Plugs and Cement Retainers that can be set either by wireline or mechanically.

All our Bridge Plugs and Cement Retainers are available in a wide range of sizes for all common casing weights. They are all designed to be easily and quickly drilled out.

Our Mechanical Setting Tool is a compact, economical tool design for setting Evolution's Bridge Plugs and Cement Retainers on Tubing.

Evolution offers a [Permanent Bridge Plug](#), as well as a the [WR Retrievable Bridge Plug](#), and a high performance drillable cast iron [Cement Retainer](#).

Packers

Packers are to used to isolate the annulus and anchor or secure the bottom of the production tubing string. Evolution offers a range of production packer designs to suit your wellbore geometry and production requirements.

Our Packer offering includes Retrievable Production Packers and accessories.

They range from the [32-A Tension Set Packer](#), [Lock Set Packer](#), [AD-1 Tension Packer](#), [ADL-1 Tension Packer](#), [Coiled Tubing Smart-J Tension Packer](#), [FH Hydrostatic Double Grip Packer](#), [G Retrievable Casing Packer](#), [AS1-X Arrowset Packer](#), [PS-TXT Packer](#), [R3 Retrievable Casing Packer](#), and the [Two Cup Packer](#).
